Top five reasons to own a Night Owl Security System

View & Control Anywhere in the World

This smart H.264 DVR will allow you to view all of your cameras remotely on select 3G/4G Smart Phones running Windows Mobile®, Symbian®, iPhone®, iPhone®, Android® and select Blackberry® Models on 3G/4G networks are all compatible. You can also view all of your cameras on your tablet PCs such as iPads®, and Tablet PCs running Windows® Mobile, Windows® 7 and Android® Operating Systems.

In addition, this smart H.264 DVR allows you to view and control your system over the Internet using Safari 5.0 (Mac) and/or Internet Explorer (PC). No matter where you are in the world you can log into your system and watch real time video streams, playback previously recorded files and even backup the system remotely. The network ready feature also turns any computer screen on your network into a live surveillance center. Having the ability to check on your home or business has never been easier.

Laptop not included
Motion Activated Email Alerts

Advanced H.264 DVR Technology

Motion Activated Recording with Real Time Email Alerts

Motion activation allows you to record only when necessary, and makes it easy to find important footage during video playback. This will save you time and conserve hard drive space. Enhanced motion detection settings ensure that false alarms are not triggered. An easy motion detection mask allows you to block out areas with constant movement, such as roads or trees. This feature also will send you a real time email alert with an image attachment to your Smartphone or PC when the cameras detect movement.

Easy Backup Options with 24/7 Recording

The built-in USB port 2.0 allows you to backup your important video footage directly to a USB flash drive or external USB hard drive. (Peripherals not included).

Connects Directly to your TV or Monitor

This DVR easily connects to your TV for instant viewing and comes equipped with 2 video outputs so you can connect multiple TVs. For your convenience we have included a 6ft RCA cable. In addition to being able to connect directly to your TV, this DVR also comes equipped with a VGA output jack to connect directly with any computer monitor or TV with a VGA input. (VGA cable not included)

Simple Point and Click Interface with a 500GB Hard Drive Pre-Installed

The Poseidon-85 comes equipped with a state of the art, easy to use icon based interface. All you need to do is point and click to access any of the features of the DVR. The interface is very user friendly and comes equipped with both a USB mouse and remote control. Utilizing H.264 compression this system records up to 1 year of video with its pre-installed 500GB security certified SATA hard drive (expandable up to 2TB Sata). The hard drive was specifically designed for DVRs, and provides faster read/write times and reliable recording of your video surveillance footage.

Night Owl CAM-4PK-CM115 (2PKs)

4-Pack Indoor / Outdoor Night Vision Cameras

The cameras come equipped with 11 infrared LEDs and have night vision up to 30 ft in complete darkness with a sharp Color CMOS sensor that produces clear and crisp images at 420 TV lines of resolution. This equates to about 20ft of facial recognition which is imperative for law enforcement to be able to prosecute a perpetrator. The housing is specifically designed to be used indoors or outdoors and can withstand temperatures between 0°F and 114°F. Utilizing IP-66 the camera is water and weather resistant. They connect directly to your DVR utilizing the industry standard BNC connectors. All Night Owl cameras are compatible with every Night Owl DVR system. Poseidon-85 comes complete with 2 packages of CAM-4PK-CM115.

In today's world, owning a DVR video surveillance system is absolutely critical for keeping your family or business safe. Unlike alarm systems, digital video recorders (DVRs) have the ability to not only to warn you when motion has been detected but it will record hard video evidence. In addition, all recordings can be easily backed up or transferred digitally and given to the proper authorities. Don't wait until it is too late; protect your home and/or business today with a Night Owl Digital Video Recording Security Kit.

- *H.264 Compression Technology and 500GB Hard Drive Pre-installed* Utilizing H.264 compression, this system allows you to deliver stunning video quality and save more video footage than traditional compression methods thus giving you up to 2X more storage. The DVR also comes with pre-installed 500GB security certified SATA hard drive with overwrite HD protection which gives you the option to either stop recording or overwrite the old footage when the hard drive is full. Digital watermarking function enables the DVR to capture the data and time of recorded video footage so that it is always clear when your recorded video footage took place.

- *High Quality Image Capture* The 8 indoor/outdoor color cameras provide clear, crisp and enhanced images at 400 TV line resolution and the included 11 infrared LEDs enable night capturing capability up to 30 feet away.

- *Viewable over Smartphones/Tablets* Having the ability to check on your home or business has never been easier. This smart H.264 DVR will allow you to view all of your cameras remotely on select 3G/4G smart phones (Windows Mobile, Symbian, Blackberry and iPhone on 3G/4G networks) and Tablet PCs (iPads, Tablet PC running Windows Mobile, Windows 7 or Android operating system).

- *Viewable over the Internet* This network ready H.264 DVR kit allows you to view and control your system over the internet using Internet Explorer (Internet Explorer 6 or higher) or the included advanced PC remote viewing software. No matter where you are in the world you can log into your system and watch real time video streams, playback previously recorded files, backup the system remotely and even configure DVR settings remotely. The network ready feature also turns any computer screen on your network into a live surveillance center. (Ethernet cable included)

- *Point & Click Interface* The system comes equipped with a state of the art, easy to use icon based interface. All you need to do is point and click to access any of the features of the DVR. The interface is very user friendly and comes equipped with both a USB mouse and remote control.

- *Motion Activated Recording* Motion activation allows you to record only when necessary, and makes it easy to find important footage during video playback. This will save you time and conserve hard drive space. Enhanced motion detection settings ensure that false alarms are not triggered. An easy motion detection mask allows you to block out areas with constant movement, such as roads or trees.
